NFMW *Fund of choice!*

NFMW *Fund of choice!*

How does it work? Let us explain...

The NFMW is a defined contribution fund where you have your own account in the fund, called the fund credit. The fund credit consists of your contributions plus the employer contributions plus investment returns earned, minus the cost. When you end service, whether it is due to resignation, dismissal, death, disability or retirement, the fund credit is always payable.

We receive

MONTHLY CONTRIBUTIONS

On a monthly basis your and the employer's contributions are paid to the fund. Members contribute 2% and the employer 2% of pensionable salary.

We deduct

ADMINISTRATION COST AND RISK COVER COSTS

The risk cover costs (death, disability, and funeral cover costs) as determined by the risk option selected, and the administration cost which goes towards the day-to-day running of the fund (**0.5%**), are deducted from the employer contributions. The fund understands the impact that high costs can have on a member's retirement savings and therefore always endeavours to keep it to a minimum.

We add

INVESTMENT RETURNS

It is important to note that you carry the investment risk. This means that good investment returns will have a positive affect on your fund credit and negative returns the opposite affect.

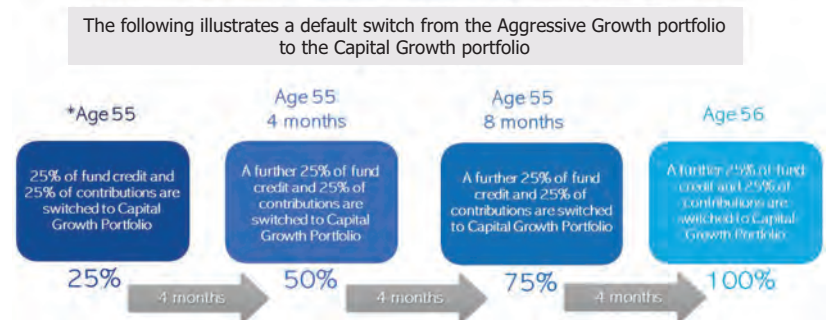

INVESTING TOWARDS YOUR RETIREMENT

LIFE STAGES

The fund applies a life stage model which automatically takes members through various investment portfolios with different risk profiles i.e. aggressive to more conservative portfolios as they approach retirement age. The life stages are provided below:

- Members younger than age 55 - Aggressive Growth portfolio
- Members age 55 and older, but younger than age 62 - Capital Growth portfolio
- Members age 62 and older - Stable Growth portfolio

The fund uses a phasing-in approach for default switches. The first 25% switch to the new recommended portfolio will commence at the end of a member's birthday month. As a result, it will take 12 months for a total portfolio switch to be completed. After the 12-month phase-in period, all future member contributions will automatically accrue to the new default life stage portfolio. See an illustration of a default switch from the Aggressive Growth portfolio to the Capital Growth portfolio.

*The first 25% switch to the new recommended portfolio will commence at the end of a member's birthday month.

MEMBER INVESTMENT CHOICE

The fund also allows flexibility in providing our members with the option to elect any of the individual investment portfolio options available.

Aggressive Growth Portfolio

Risk profile: Aggressive risk profile, with a possibility of negative and volatile monthly returns over the short and medium term.

Investment objective: To maximise capital growth over a long-term investment horizon. Members should be aware that this strategy could deliver volatile and negative returns over the short term. This strategy is suitable for members with more than ten years to retirement.

Capital Growth Portfolio

Risk profile: Medium risk profile. Expect occasional negative monthly returns and short-term volatility.

Investment objective: To target capital growth over a medium to long-term investment horizon. Members should be aware that this strategy could deliver volatile and negative returns over the short term. This strategy is suitable for members with five to ten years to retirement.

Stable Growth Portfolio

Risk profile: Cautious, expect low volatility. Positive returns over rolling 12-month periods, low probability of capital loss.

Investment objective: To target stable returns over a medium term investment horizon with low volatility and a low probability of negative returns. This strategy is suitable for members with one to five years to retirement.

Capital Protector Portfolio

Risk profile: Conservative, expect positive, nominal returns on a monthly basis with low volatility.

Investment objective: To provide capital security with very low volatility and an extremely low probability of negative returns. This strategy is suitable for members with less than one year to retirement where capital protection is necessary.

Shari'ah portfolio

Risk profile: Medium risk profile, with a possibility of negative monthly returns and short-term volatility.

This portfolio is suitable for Muslim investors requiring a Shari'ah-compliant investment portfolio. The portfolio will be invested in a variety of domestic and international asset classes. The underlying investments will comply with Shari'ah requirements as prescribed by the Auditing Organisation for Islamic Financial Institutions. The portfolio targets capital growth over the long term while limiting short-term market fluctuations.

- You can switch between the different portfolios, once during a fund year (1 July to 30 June) at no cost.
- The latest investment returns, including the fund fact sheets are available on the fund's website www.nationalfund.co.za.

Fund benefits

Life happens, and in the case of the unforeseen happening, like death or disability, it is important to know that your family will be financially taken care of.

Death and disability cover

The fund provides our members with the option to elect the amount of death and disability cover, by choosing between the two available categories.

CATEGORY	DEATH COVER	DISABILITY COVER
A1 Total cost 1,154% of monthly pensionable salary	1 x Annual Pensionable Salary + fund credit	1 x Annual Pensionable Salary + fund credit
A0 Total cost 0,075% of monthly pensionable salary	No cover (fund credit payable)	No cover (fund credit payable)

- ✓ Members have an option to change their risk category twice a year effective 1 January or 1 July and when their personal status changes. The Change in Risk cover forms must be submitted before 31 December and 30 June respectively for risk cover decreases and within 2 months after a 'life event', i.e. marriage or the birth of a child for risk cover increase applications. Medical underwriting may be required for changes.
- ✓ In the event of an active member's death or disability before retirement age, the funeral cover will continue until such time that the member would have reached normal retirement age.
- ✓ The disability benefit reduces with 1.67% per month from age 60 to 65.
- ✓ A disability claim is subject to the approval of the insurer (Sanlam).
- ✓ Death, disability and funeral cover cease when a member ends service or at normal retirement age.

IMPORTANT REMINDER! Death benefit payments are subject to Section 37C of the Pension Funds Act, which means the last will and testament, although considered for information purposes, does not determine how the death benefit is distributed. The nomination form, however, plays an important role as it is used as an important guideline when the trustees decide on who the benefit should be paid out to.

MEMBERS MUST ENSURE THAT THEIR BENEFICIARY INFORMATION IS UPDATED REGULARLY. THE INFORMATION IS TREATED AS STRICTLY CONFIDENTIAL BY THE FUND AND THE FORMS ARE AVAILABLE ON THE FUND WEBSITE, FROM THE FUND'S OFFICES AND CAN BE UPDATED ON THE SANLAM ONLINE PLATFORM
